EXAMINER'S AMENDMENT

An examiner's amendment to correct obvious errors in the application appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1. In line 2 of claim 10, the first occurrence of "the" has been deleted.
2. In line 5 of the abstract, "means of" has been deleted.

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to show a chair wherein the support structure has two lateral uprights and at least one projecting element provided with a substantially longitudinal guide, in that the backrest is associated with two angular elements, each of the angular elements having a first end connected to the backrest, a central part connected rotatably by means of a first hinging pin to a top end of one of the uprights of the structure supporting the seat and a second end connected to the seat by means of a second

hinging pin, the seat being connected to the support structure also by means of a telescopic rod which can be shortened and lengthened in a resilient manner, and an element slidably engaged in the guide of the projecting element so that a backwards rotation of the backrest about the first hinging pins causes forwards sliding of the seat, in combination with other specifically claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Applicant's drawings filed October 1, 2003 are acceptable.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Neuhoff (4537445) shows a chair with a support structure that has a guide assembly at its front end.
